#### APPLICANT'S RESPONSIBLITIES: READ CAREFULLY, THIS IS A LEGAL DOCUMENT.

- 1. This is an APPLICATION for service. The provision of sanitation facilities is dependent on Indian Health Service (IHS) site review, verification of home construction, improvements, and availability of funds.
- 2. No services can be provided without a completed and signed Application for Sanitation Facilities Form.
- Application must be given to the Tribe associated with the service area that contains the homesite property. The
  Tribe will forward the Application to IHS. Applicants without Tribal representation will forward the Application directly
  to the IHS.
- 4. Applicant must provide proof of a legal claim to the land (e.g., copy of allotment, lease, or deed) as part of this application. The homesite must be a primary residence of the Applicant. No services can be provided to other than primary residences.
- 5. An IHS representative will visit the homesite to determine site suitability. Prior to this visit, the Applicant must locate property corners, underground utilities, and the proposed house location (new homes). See Site Drawing.
- 6. By way of the Applicant's signature, IHS representatives are granted permission to enter upon the land for the purpose of carrying out the site approved work. This work may include, but is not limited to, digging soil test pits, conducting percolation tests, and drilling test wells. The Applicant agrees to waive all claims which may arise from such entry and testing except those claims which may be recognized under the General Tort Claims Act. If the Applicant is not the landowner, the landowner must co-sign this application.
- 7. It is important that the Applicant understand that under Public Law 86-121, IHS cannot own, operate, or maintain the Applicant's completed facilities. All construction facilities will be transferred to the Applicant when construction is completed. For community facilities, the Applicant's responsibility is for individual facilities such as water service lines from the house to the curb stop or meter and sewer service lines from the house to the property line.
- 8. The IHS does not provide inside plumbing. Plumbing must be inside the house with a protruding stub 5-foot beyond the foundation to connect to outside plumbing.

IT IS STRONGLY RECOMMENDED THAT DEVELOPMENT OF NEW SITES NOT OCCUR UNTIL AVAILABILITY OF WATER AND SEWER SERVICE HAS BEEN DETERMINED. IT IS FURTHER RECOMMENDED THAT OCCUPANCY OF NEW HOUSES NOT OCCUR PRIOR TO RECEIPT OF SANITATION FACILITIES.
